

PHP Web Application for Online Education & Assessment System

Client: The client is a modern educational institution providing a comprehensive range of education in various fields in the USA.

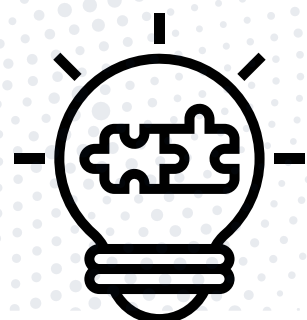

Business Challenge:

Since the education system is turned to online nowadays i.e., conducting an online assessment, training new skills for learning. Our client wanted a web app that helps entirely online learning.

Solution Delivered:

After a thorough analysis of the requirements, we helped develop an intuitive and enriched web application for students and staff. Once the applicant is registered, they will be able to access all the features in learning and choose to learn the skills they desire. Resource material such as videos, reference links, eBooks, photos are provided with staff assistance, which helps students learn & practice new skills. Deploying intelligence in the application helps in the progress of students to find the capability of increasing their proficiency deeply in the selected course.

Business Benefits:

With our online education & assessment system web application, they were able to achieve:

-  Easy monitoring progress of the students.
-  Tracking the assignments.
-  Easy Resource and eBook accessing.
-  Easy Navigation into the application.
-  Detailed report on staff's performance.
-  Knowledge evaluation in the selected course.
-  Dashboard of every student learning.
-  Easy and intuitive UI/UX while using the app.
-  Remainder for the assessment.
-  Easy operation on desktop and mobile platforms.
-  Enhanced visual appearance with color and modes.
-  Multiple devices and enhanced security.
-  Clarity with illustrations and icons.
-  App with large storage capacity.

Technologies Used:

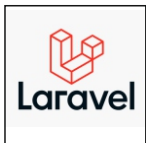

JavaScript

PHP

MySQL

Laravel framework
