

## Real Estate Mobile App

The Client is an IT Solutions Provider and engages in enterprise information technology consultancy in addition to ongoing engineering projects and operations support to its customers. The organization has demonstrated successes in producing large-scale web-based solutions and has enjoyed significant success in the private sector; most notably in the development, delivery and support of the world-class real-estate platform.

### Business Requirements

With an increasing need for residential and commercial properties in Australia, the customer felt the need for a dedicated residential property website, which would have strict criteria for new technologies, including the ability to deliver impressive performance results to exceed the requirements of the users.

Apart from the availability of the website, the customer also needed a mobile app through which clients can also search for properties.

### Our Solutions

The application to be made available in the iOS Devices would consider the app that is available on real estate constituting sale, rent, and share, CGVAK implemented the following sections:

- ★ Search to buy option
- ★ Properties in nearby Location
- ★ Price Range Filters
- ★ Details about the property
- ★ Map View of the Property
- ★ Image Gallery of Property
- ★ Option to select Selling, Renting or Sharing a Property
- ★ Ensured transparency throughout the procurement process.

### Benefits

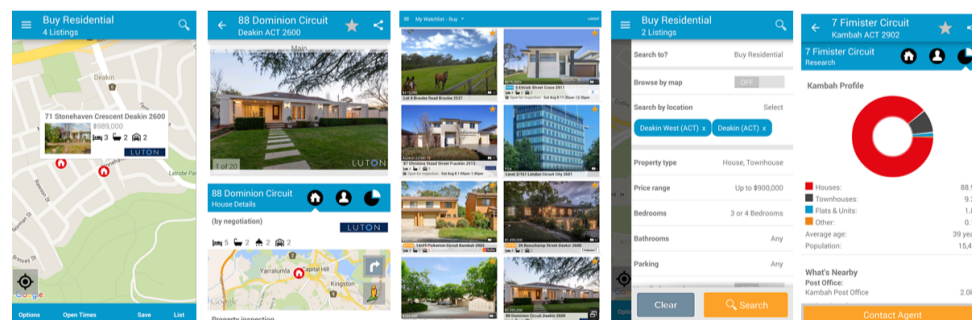

CGVAK succeeded in providing a complete real estate mobile app:

- ★ User-friendly interface for mobile devices
- ★ Notifications about the range of properties available
- ★ Helped the end client to win awards for the Mobile App in their category of business.
- ★ Increased user base by over 50%

### Tools & Technologies

iOS Framework, Objective C, XCode, JSON API, SQLite
